

MVA-3 Foam guns

- Light weight and versatile foam guns
- Manufactured from sturdy fiber glass reinforced polymers with easy cleaning properties
- Barrel and nozzle made from galvanised steel ensure maximum durability and impact resistance
- Most durable needle sealing of all foam guns (150.000 – 200.000 cycles)
- Ergonomic handle (LiCADs Analysis) and very low weight guarantee easy and comfort use without fatigue
- Precise flow adjustment knob
- 7 different nozzle types, 9 attachable tips, optional aluminium adapter
- Adapter fits all PU-foam, PU-adhesive and PU-cleaner cans on the market
- Weather and impact proof for operation in all conditions
- Guaranteed quality with 100% control, every manufactured gun is inspected and pressure tested
- ISO 9001:2015 - Quality Management System for Research, Development and Production of foam guns
- Patented technologies and design with over 30 years of experience
- Made in Europe with European materials and resources
- Conforming to European environmental and social laws, regulations and standards

Type: MVA-3

- Sturdy fiber glass reinforced polymers with easy cleaning properties

Type: MVA-3 TA + Non-stick coated metal adapter

- Metal adapter made of high pressure casted aluminium alloy

Type: MVA-3 PA + silver polished metal adapter

- Metal adapter made of high pressure casted aluminium alloy

Type: MVA-3 PL + polymer composite barrel

- Special fiber glass reinforced polymer composite barrel
